

## Consultant Climate Adaptation and PSAA Feasibility Lead for GCF Initiative in Vietnam

Client: CARE Netherlands  
Year: 2025  
Service: Sustainable Financing

Symmetry supports CARE in the development of a high-quality GCF PSAA application that is strategically aligned, technically robust, and country-owned.

A key objective is to identify and articulate CARE's comparative advantage and institutional readiness to deliver impactful climate adaptation programming. Symmetry aligned project design with GCF priorities and CARE's global and regional climate strategies. Symmetry team guide CARE Country Offices to build strong country ownership by supporting engagement with National Designated Authorities (NDAs), aligning with national climate priorities, and ensuring local perspectives are integrated throughout the process. Another core objective is to conduct robust, evidence-based climate risk and vulnerability analyses using IPCC-aligned data, geospatial tools, and inclusive methodologies.

This provides the scientific foundation for a well-defined climate rationale and supports the development of appropriate, context-specific adaptation strategies.

Symmetry delivers key PSAA outputs, including a detailed feasibility study, an investment pitchbook, and a fully developed GCF Concept Note. All deliverable is designed to align with the GCF's six investment criteria and corporate priorities, enabling to delivery of a high-quality Concept Note fully aligned to the needs and priorities of the Mekong countries and the GCF ultimately.
